

## **LIQUID SKIN**

**Liquid skin** (sort-Nr.: 1020014) is a product of Blond & Braun and is applied mainly to the production by bald heads. However, fluid skin also becomes for toupee applications, the gear intensification and many things more applied.

### **A possibility of the bald head manufacturing:**

A bald head prank head constant to solvent (possibly sort-Nr.: 1020010) is easily powdered, then 4-7 shifts "liquid skin" are spread in intervals by approx. 10 minutes.

After the last layer wait half an hour, afterwards powder and take it off. Besides, with the bald head Art-Nr.:1020010 no additional powdering or careful remachinings is necessary!

After the drying time of 30 minutes „liquid skin" has not dried up" yet. Therefore, the taken bald head on a clean, smooth wooden head is drawn up(wound up) which shows the required bald head size. The drawn up bald head is fixed in the neck attempt by means of rubber band. Now one lets dry up the bald head approx. 3 hours in well aired space. Now after decline of the wooden head the bald head has the wished size.

### **Special advantages of "fluid skin":**

- It remains about a long time very elastic (also without weld)
- Is by high elasticity very thinly applicable "
- Is by high elasticity very rice-firm"
- Is size-changeable in the dehydration phase, afterwards fixed"
- Is in the crossing with acetone solvable "
- Is good to fix with mastix

### **Special tips:**

- The finished bald head can be turned, if you powder the bald head before and is relatively mat .
- " Liquid skin " is dilutable with acetone. .
- " Liquid skin " is to be dyed problem-free with fat makeup or special PVC-lacquers.

For bald head manufacturing „liquid skin" is to be applied " naturally also in other procedures like diving, syringes, flecks, etc optimally.

### **Attention:**

Easy inflammable. Do not damp inhale. Avoid skin and eye contact. Keep away from children!
