

THERMOFORM

is a natural cotton fabric impregnated with a thermoplastic resin – specially designed for:

- Theatre and cinema scenery
- Sculptures, moulding
- Masks, armours...
- creation of various forms
- strengthening of silicone copies

Key Benefits:

- rigid
- adheres to it self
- rapid and easy to use
- no waste: all cut-offs can be reused
- light weight
- biodegradable

General instructions:

- Cut Thermoform to requested shape with scissors (Thermoform can be cut either warm or cold)
- Immerse Thermoform in warm water (70°C or 160°F). After a few seconds, it becomes mouldable and adheres to itself. Once drained, you can mould it. It is better to use dry heat for minor touch ups and weldings.
- As long as Thermoform is warm, it can be welded onto itself or on another piece.
- Thermoform can be heated and cooled repeatedly. It can be moulded as many times as requested.

4 sheets (á 45 x 60 cm)

1 meter

Thermoform heavy

€ 63,17

€ 65,60

(120 cm width)

Thermoform light

€ 56,36

€ 44,67

(90 cm width)
