TELESIS PRODUCT INFOS

„SUPER SOLV“™ # 1020452

Non oily, hydrocarbon based, pleasantly scented, extra strength adhesive and prosthetic remover. Allows rapid removal of adhesives and prosthetics without damage to appliances and latex forms. Excellent for use on delicate lace wigs.

„SUPER SOLV PLUS“™ # 1020451 – this advanced SUPER SOLV formula is specifically designed for use on sensitive skin. It contains vitamins D & E and special silicones that help to condition and moisturize the skin while removing make-up and adhesives with the same cutting strength as the original SUPER SOLV.

„SUPER SOLV-GEL“™

Especially for the face, not rinsing for the eyes, mouth and nose.

„BRISK“™ Scalp Freshener & Cleanser, # 1020461

Peppermint oil fragranced skin cleanser. An excellent antiseptic blend of analgesics and astringents that contains a natural germicide and fungicide. Brisk cleans and refreshes itchy, irritated skin caused by oils, perspiration and extensive prosthetics wear.

„TOP GUARD“™ Skin barrier, # 1020471

Methacrylate based, skin prep and surface primer, mild alcohol odor. A superior water and perspiration resistant formula that reduces skin irritation and increases the adhesion of prosthetic devices and paintings of the skin-illustrator.

„BETA BOND PLUS“™, Special adhesive

While the original BETA BOND is known for its great vertical hold, BETA BOND PLUS provides different performance characteristics, making both adhesives the perfect combination for acrylic bonding. BETA BOND PLUS offers a horizontal bond that is unequalled by any other acrylic adhesive. BETA BOND PLUS absorbs powder, makes edges nearly invisible, is easy to remove with BETA SOLV and is tackier and more pliable than the original BETA BOND.

„BETA SOLV“™, Solver, # 1020447

This high solvency formulation is remarkably effective in removing Beta Bond adhesive products and Beta Bond "Pax" type paints from the skin and appliances. It is non oily, not harmful to materials and may be diluted with water. Beta Solv has been scientifically tested on human skin and results showed no evidence of dermal irritation.

„SKIN ILLUSTRATOR™“ #1020-475,476,480

6 different pal.; each has 10 colours. The Skin Illustrator Palettes are durable, water and abrasion resistant alcohol activated make-up. Created by professionals for professionals, Skin Illustrator is designed to speed up the process for colour application and touch ups by greatly reducing the need to mix colours. The wide range of colours allows you total control to create any illusion. It will cover tattoos, create effects, colour hair, and it can be used on skin, foam latex, gelatine, plastics and silicone appliances. The high pigment content provides rich colour tones that stay in place and last all day.
